

Lead In Roller

FEATURES

Product Description:

The Lead-In Roller is designed to facilitate the smooth entry of cables, wires, or hoses into trenches. Its durable construction and ergonomic design help reduce wear and tear on cables while ensuring efficient operation in various industrial applications. The V-shaped cable roller is designed as the widest and most heavy-duty option, ideal for supporting large cables in demanding environments.

Adaptability:

This versatile cable roller can also function effectively as a pipe roller, accommodating various sizes and shapes with ease.

Alignment:

The cable is centralized before being fed into the trench to ensure optimal alignment and ease of installation.

Durability:

Maintenance-free, dust- and waterproofed rubber-sealed ball bearings provide reliable performance in demanding environments.

SPECIFICATION

MODEL: LIR 3304

Item Code	LIR 3304
Length (mm)	1050
Width (mm)	600
Height (mm)	450
Weight (kg)	30.25
Construction	Heavy Duty
Finish	Powder coated & Electro Galvanized

Due to policy of continual improvement, the specifications are subject to change without prior notice.
