

Cable Roller Straight with Ground Plate

FEATURES

Product Overview:

The Straight Cable Roller with Ground Plate is designed to ensure stability and support during cable installations. The integrated ground plate prevents movement and shifting, making it ideal for heavy-duty applications in construction, telecommunications, and industrial settings.

Ground Plate Design:

The integrated ground plate enhances stability and prevents tipping, especially on uneven surfaces, ensuring safe operation.

Seamless Operation:

Cables can easily ride over metal rollers without getting stuck, enhancing operational efficiency.

Straight Roller Design:

Specifically designed for straight cable pulls, reducing friction and wear on cables during installation.

Heavy-Duty:

Heavy duty steel structure and rollers equipped with ball bearings; The metal rollers do not deform under the weight of the cable during laying.

Maintenance Free:

Designed to require minimal upkeep, enhancing convenience for users.

High Safety Factor:

The design and choice of materials ensure a high safety factor.

SPECIFICATION

MODEL: SGP 1111

Length (mm)	400
Width (mm)	245
Height (mm)	195
Weight (kg)	4.10
Cable Capacity (mm)	155
Carrying Load (kg)	400
Finish	Electro Galvanized

Due to policy of continual improvement, the specifications are subject to change without prior notice.
