

Cable Roller Straight

FEATURES

Product Overview:

Engineered for durability and efficiency, this cable laying roller system is the ideal solution for trench-based cable installation. Its robust design ensures smooth operation, long-lasting performance, and reduced downtime on the job site.

User Friendly:

The compact and sturdy frame is specifically designed for easy placement directly into trenches.

Seamless Operation:

Cables can easily ride over metal rollers without getting stuck, enhancing operational efficiency.

High Safety Factor:

The design and choice of materials ensure a high safety factor.

Heavy-Duty:

Heavy duty steel structure and rollers equipped with ball bearings; the metal rollers do not deform under the weight of the cable during laying.

Dynamic Load-Bearing Ability:

The heavy-duty rollers and steel frame are designed to absorb and manage the dynamic forces encountered during cable pulls. This results in excellent load-bearing capacity and consistent performance, even under demanding load fluctuations.

Maintenance Free:

Designed to require minimal upkeep, enhancing convenience for users.

SPECIFICATION

MODEL: STR 1105

Length (mm)	300
Width (mm)	240
Height (mm)	250
Weight (kg)	4.1
Cable Capacity (mm)	Ø155
Load Capacity (kg)	400
Finish	Electro Galvanized

Due to policy of continual improvement, the specifications are subject to change without prior notice.
