

# Cable Roller Straight - Bridge Type

## FEATURES

### Product Overview:

The Cable Roller Straight - Bridge Type is specifically designed to allow cable installation over previously laid cables. This innovative tool can be placed directly above an existing cable, providing a stable elevated rolling surface that enables a new cable to be pulled smoothly over the top without disturbing or damaging the cable underneath.

### User Friendly:

The compact and sturdy frame is specifically designed for easy placement directly into trenches.

### High Safety Factor:

The design and choice of materials ensure a high safety factor.

### Heavy-Duty:

Heavy duty steel structure and rollers equipped with ball bearings; the metal rollers do not deform under the weight of the cable during laying.

### Dynamic Load-Bearing Ability:

The heavy-duty rollers and steel frame are designed to absorb and manage the dynamic forces encountered during cable pulls. This results in excellent load-bearing capacity and consistent performance, even under demanding load fluctuations.

### Maintenance Free:

Designed to require minimal upkeep, enhancing convenience for users.

## SPECIFICATION

### MODEL: STR 1105

|                     |                    |
|---------------------|--------------------|
| Length (mm)         | 300                |
| Width (mm)          | 240                |
| Height (mm)         | 250                |
| Weight (kg)         | 4.15               |
| Cable Capacity (mm) | Ø155               |
| Load Capacity (kg)  | 400                |
| Finish              | Electro Galvanized |
