

Cable Roller Straight - Wide

FEATURES

Product Overview:

The Wide Straight Cable Roller is engineered for optimal stability and support during cable installations. Its wider design allows for accommodating larger cables and provides enhanced protection against wear and damage, making it an essential tool for various industrial and construction applications.

Seamless Operation:

Cables can easily ride over metal rollers without getting stuck, enhancing operational efficiency.

High Safety Factor:

The design and choice of materials ensure a high safety factor.

Heavy-Duty:

Heavy-duty steel structure and rollers equipped with ball bearings; the metal rollers do not deform under the weight of the cable during laying.

Dynamic Load-Bearing Ability:

The heavy-duty rollers and steel frame are designed to absorb and manage the dynamic forces encountered during cable pulls. This results in excellent load-bearing capacity and consistent performance, even under demanding load fluctuations.

Maintenance Free:

Designed to require minimal up keep, enhancing convenience for users

SPECIFICATION

MODEL: STR 1110 Wide Roller 10"

Length (mm)	400
Width (mm)	310
Height (mm)	245
Weight (kg)	5.15
Cable Capacity (mm)	220
Load Capacity (kg)	400
Finish	Electro Galvanized

Due to policy of continual improvement, the specifications are subject to change without prior notice.
